

# MINet - Cost-Effective, Mission-Critical Support for Business and Government.

Why would an organization burden itself with the capital, operational and maintenance expense of disaster recovery, PBX, and business continuity, when all of these are available as a service?

MINet handles all the heavy lifting and allows testing of data as needed set by your stated requirements.

**Contact us:**

Six Degrees Consulting, Inc.  
227 S.W. Pine St. - #300  
Portland, OR 97204  
(503) 289 - 7255

•**Disaster Recovery** – MINet maintains a copy of your data offsite with daily, hourly or real time mirroring of your files to MINet’s secure storage. This can effectively eliminate your reliance on tape as a backup method.

•**Business Continuity** – Similar to DR but MINet creates and maintains a virtual version of your servers and data that can operate as production servers in the event of a primary failure. The cutover from a failed device to the virtual server can happen in minutes allowing your organization to continue with your business without interruption.

•**Virtual PBX** – MINet provides a fully-functional, feature-rich PBX solution to you as a service. This include all of the features found on high end enterprise systems like auto attendant, music on hold, conference bridge with web integration, DID management, voicemail and desktop integration. You can have all of the benefits of an expensive solution – without the expense.

**Other Service offerings:**

- Remote Backup/Recovery
- Managed Firewall Services
- Virtual Desktop Via Sunray
- Managed Phone/Desktop
- Virtual Office
